HARINI A K

hariniak006@gmail.com | 7902010306 | LinkedIn | GitHub

CAREER OBJECTIVE

Motivated Computer Science undergraduate with hands-on project experience in Java, Python, and Web Development. Interested in applying technical skills to collaborative academic and industry projects.

EDUCATION

Amrita Vishwa Vidyapeetham, Coimbatore **2023 – 2027**
Bachelor of Technology in Computer Science Engineering **CGPA: 6.52**

SKILLS

Programming Languages — Java, Python, C
Frontend — HTML, CSS, React.js
Backend — Node.js, Express.js, FastAPI
Databases — MySQL, PostgreSQL
Tools — Git, Github, VSCode

PROJECTS

Medical Hallucination Detection and Classification using Machine Learning **11/2025 – Present**

- Analyzed hallucinations in Large Language Models for healthcare-related queries using structured evaluation methods.
- Conducted in-depth literature review of recent research papers and identified key research gaps in medical AI reliability.
- Evaluated model outputs based on factual accuracy, consistency, and domain-specific correctness.
- Explored prompt engineering and fact-checking approaches to improve trustworthiness of AI-generated medical responses.

Project Tracker, Full Stack Web Application

- Built a multi-view project management tool with Kanban, List, and Timeline views.
- Implemented custom drag-and-drop functionality with smooth UI interactions.
- Designed responsive frontend using React and TypeScript.
- Optimized state management and rendering for improved performance.
  Live: https://project-tracker-owa1.vercel.app/

AI-Based Attendance System Using Facial Recognition

- Developed a full-stack web application with React frontend and Python-based face recognition backend.
- Integrated REST APIs for real-time attendance updates and dashboard visualization.
- Automated student tracking system, reducing manual attendance effort.

Golf Charity Subscription Platform

- Developed a full-stack web application using Next.js and Supabase that enables users to manage golf scores, subscribe to a platform, and participate in a monthly draw system integrated with charity selection.
- Implemented secure authentication, route protection, and an admin panel for system management.
  Live: https://golf-charity-platform-1gmj.vercel.app/

AI-Enabled Crop Disease Diagnosis & Severity Detection System

- Developed REST APIs using FastAPI for AI model inference and severity classification (~96% accuracy).
- Designed backend with PostgreSQL and implemented asynchronous processing using Celery & Redis.
- Built scalable architecture to handle multiple prediction requests efficiently.

TRAININGS / CERTIFICATIONS

Data Science **05/2024 – Present**
IITM BS Degree, Virtual

HACKATHONS

Participant – ByteVerse 7.0 Hackathon by NIT Patna, **04/2025**
Python, Streamlit, OpenAI API, HTML

- Developed an AI-powered web app promoting mental wellness through conversational AI, mood tracking, and interactive games within a limited time frame as part of a collaborative team effort.
- Contributed to front-end/back-end, enhancing problem-solving and time management skills.

EXTRA CURRICULAR ACTIVITIES

- Actively participated in NSS for 2 years, contributing to community service and social welfare programs.
- Class Representative 3rd year
